

INSTRUMENTATION AND PROCESS CONTROL SYSTEMS ENGINEERING

Use process control technology principles to achieve effective maintenance and control of industrial systems

6 - 8 September 2021
1.00PM - 6.00pm | GMT+8

Interactive Virtual
Instructor-Led Training

WHY YOU SHOULD ATTEND

This virtual training will help participants to have a deep understanding on instrumentation and process control engineering. In this training, participants will get to explore different types of instrumentation and process control engineering applied in various industries and projects.

This training will be beneficial to professionals in the field who are looking at developing their skills and knowledge on principles of process control and main control strategies used in most of the plants.

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.

AUDIENCES

This training is specifically designed for: -

- Instrumentation Engineer
- Control System Engineer
- Design Engineer
- Implementation Engineer
- Technologist
- Process Control Engineer
- Automation Engineer
- Installation and Maintenance Technicians
- Instrument and Process Control Technicians
- System Integrators
