

Crude Oil Storage, Management, Handling, Measurement & Loss

Master the modern oil movement techniques for safe operation of oil storage facilities

1 - 3 August 2022
1.00pm - 6.00pm | GMT+8

**Interactive Virtual
Instructor-Led Training**

WHY YOU SHOULD ATTEND

This highly intensive and practical Virtual Instructor-Led Training will help participants to gain the knowledge and ability to determine if a metering system is fit for the purpose of crude oil management.

Participants will also understand the principles of fluid dynamics, meter runs, flow computers and related quality systems, applied specifications of accuracy terms, and calibration. By end of this training, participants will have a better understanding of the techniques related to crude oil handling and management within the industry.

AUDIENCES

This training is specifically designed for: -

- Refinery Personnel
- Operations Managers
- Oil Terminal Superintendent
- Plant Supervisors
- Maintenance and Facility Managers
- Production Managers
- Technical & Utility Manager
- Mechanical Engineers
- Instrumentation / Control Engineers
- Process Engineers

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.
