

API 510: PRESSURE VESSEL INSPECTION

Improve management control of operation, inspection and maintenance

5 - 7 December 2022
12.00pm - 5.00pm | GMT+8

Interactive Virtual
Instructor-Led Training

WHY YOU SHOULD ATTEND

This Virtual Instructor-Led Training will help participants to understand vessel corrosion and deterioration and ways to handle vessel relief devices. Vessel welding and weld joint categories will be reviewed.

Participants will learn how to conduct internal and external pressure calculation and the pressure testing requirement which are important after each repairing activity. At the end of the training, participants will be guided on preparation for API 510 Inspector certification.

AUDIENCES

This training is specifically designed for: -

- Pressure Vessel Inspectors & Engineers
- Maintenance Engineers
- Inspection Engineers
- Integrity Engineers
- Safety Engineers
- Operations Engineers
- Design Engineers
- Plant Inspectors
- Project Managers

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.
