

Construction Project Cost Estimating

Perform detailed cost estimates for your construction projects

27 – 29 March 2023

This is an **interactive Virtual Instructor-Led Training (VILT)**.
Kindly ensure you have a working Webcam and Headset with Microphone.

KEY BENEFITS OF ATTENDING

- **GAIN** knowledge of techniques used in construction project estimating, from the conceptual design stage to the final detailed estimate
- **UNDERSTAND** the different types of estimates used to progressively estimate project costs accurately
- **INTEGRATE** all relevant project elements into a cohesive and comprehensive cost estimate
- **PREPARE** budget estimates that will enable the owner-organization to make informed decisions as to the feasibility of a potential project
- **COMPARE** the costs of alternative strategies or technical approaches to ensure the most economic project at the desired level of quality
- **KEEP** accurate control of the progressive budgeting process based on the various stages of design
