

A banner image showing two men in an industrial setting. One man is wearing a white lab coat and a yellow hard hat, while the other is in a dark suit and a white hard hat. They are looking at a large set of blueprints. In the background, there is an oil and gas production facility with various pipes, tanks, and structures.

Oil & Gas Production Engineering

Maximize oil and gas production through cost-effective methods

20 - 21 March 2023

This is an **interactive Virtual Instructor-Led Training (VILT)**.
Kindly ensure you have a working Webcam and Headset with Microphone.

KEY BENEFITS OF ATTENDING

- **UNDERSTAND** different sectors of the oil industry
- **IDENTIFY** the main components of the production system
- **DEVELOP** and **ANALYZE** inflow and vertical lift performances (IPR & VLP)
- **APPLY** production system analysis and **PREDICT** maximum production rate
- **SELECT** suitable well completion type and perforation
- **EXAMINE** two and three phase separators
- **SCREEN** different artificial lift methods for your well conditions
- **FOCUS** on well stimulation processes of acidizing and fracturing
- **CLASSIFY** different enhanced oil recovery (EOR) methods
