

Shutdown Turnaround Outage (STO) Management

Optimize asset integrity and mitigate the risks of prolonged outages

8 - 10 May 2023

This is an **interactive Virtual Instructor-Led Training (VILT)**.
Kindly ensure you have a working Webcam and Headset with Microphone.

KEY BENEFITS OF ATTENDING

- **APPRECIATE** the significance of proper coordination for Shutdown and Turnarounds
- **DEVELOP** a robust Front-End Loading (FEL) process for STOs
- **COMPREHEND** the criticality of transition phases in Turnaround project
- **IDENTIFY** methods for proper work closure and documentation
- **LEARN** the lessons from interactive industry cases
- **ADDRESS** key scheduling issues to avoid execution deviations
- **IMPROVE** performance by benchmarking and setting up of KPIs
- **SETUP** Action Plan encompassing the lessons learned to avoid recurrence of anomalies in future STOs
