

Process Analyzer and Sampling System

A-Z of handling, design and application of process analyzer and sampling system, in and out

11 - 14 September 2023
9.00am - 5.00pm | GMT+8

Concorde Hotel
Kuala Lumpur, Malaysia

WHY YOU SHOULD ATTEND

This 4-days masterclass discusses the complete analyser systems while special attention is given to applied sampling system. It will also cover the main types and principles of currently applied process analyzers ranging from physical properties, on-line chromatography and water type analysis to the promising future of spectroscopic type of on-line analysis.

Delegates will also be exposed to the advantages and disadvantages which will be clarified with the aim to enhance the understanding of operational ranges and limitations of each type of analysis system.

Organised by:

WEeventz Pte Ltd (Singapore)
WEeventz Malaysia Sdn Bhd (Malaysia)

AUDIENCES

This training is specifically designed for those who are regularly involved in process analyser system including: -

- Instrument technicians
- Instrument engineers
- Analyzer engineers
- Lab managers
- System and design engineers
- Plant Chemists
- Integrators
- Operation personnel
- Maintenance supervisors
- Maintenance technicians
