

ROTATING EQUIPMENT MASTERCLASS

Adopt the methods to maximize efficiency, reliability and longevity of rotating equipment

22 - 24 July 2024
1.00pm - 6.00pm | GMT+8

Interactive Virtual
Instructor-Led Training

WHY YOU SHOULD ATTEND

This Virtual Instructor-Led Training will introduce various types of rotating equipment and focus on maximizing the efficiency, reliability, and longevity of this equipment by providing an understanding of the characteristics, selection criteria, common problems and repair techniques, preventive and predictive maintenance to participants.

By the end of the training, participants will be able to use key components of preventive and predictive maintenance methods in order to improve equipment reliability while reducing operation and maintenance costs.

AUDIENCES

This training is specifically designed for: -

- Maintenance Engineers
- Operation Engineers
- Process and Control Supervisors
- Plant Operators
- Technical Managers
- Facilities Engineers
- Mechanical Engineers
- Engineering Managers

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.
