

# Hydraulic and Pneumatic Systems

*Learn the importance of good equipment for optimal machinery performance*

**22 - 24 April 2024**  
1.00pm - 6.00pm | GMT+8

**Interactive Virtual  
Instructor-Led Training**

## WHY YOU SHOULD ATTEND

This Virtual Instructor-Led Training will help participants a broad-based knowledge of hydraulic equipment and will be able to identify symbols and components used in schematic drawings. Participants will also understand the importance of cleanliness levels, good safety practices, and best practices in fault-finding techniques and procedures to reduce costly downtime.

The training will also provide delegates with better working expertise and an understanding of fluid power systems to be familiar with routine maintenance and repair works. The training session is inclusive of short lectures, activities, presentations, discussions, case studies, and ideas sharing with continuous evaluation, and real-time feedback.

## AUDIENCES

This training is specifically designed for: -

- Operation and Maintenance Engineers
- Consulting Engineer
- Hydraulic System Designer
- Technical Services Executives
- Application Engineers
- Maintenance and Production Supervisors,
- Foreman and Technicians
- Procurement and Auditing Personnel
- Plant and Facilities Engineers

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.
