

Aboveground Storage Tank Management

Increase storage tank life by applying correct measurement and control techniques

27 - 28 May 2024
1.00pm - 6.00pm | GMT+8

Interactive Virtual
Instructor-Led Training

WHY YOU SHOULD ATTEND

This virtual training will provide participants with an in-depth knowledge of storage tank and tank management systems. Participants will explore the different functions of the structural parts and accessories of the traditional storage tank, the design and operation of the storage tank, and understand different maintenance methods.

By completing this training, participants will be able to implement tank inspection and maintenance strategies, and perform tank integrity and fitness calculations to repair or replace tank components.

This is an **Interactive Virtual Instructor-Led Training (VILT)**. Kindly ensure you have a working Webcam and Headset with Microphone.

Organised by:

WEeventz Pte Ltd (Singapore)

WEeventz Malaysia Sdn Bhd (Malaysia)

AUDIENCES

This training is highly recommended for managers and engineers involved in the following capacities: -

- Operators
- Technicians
- Operation Engineers
- Operation Managers
- Design Engineers
- Safety Personnel
- Process Engineers
- Plant Managers

It is also crucial for personnel involved in the operation and maintenance of storage tanks in the following industries:

- Oil and Gas - Onshore & Offshore
- Oil Refineries
- Chemical & Petrochemical
- LNG Terminals
- Power, Aluminium and Paper
