

Financial Modeling Using Excel

Achieve well-constructed and error-free financial models

10 – 11 June 2024

This is an **interactive Virtual Instructor-Led Training (VILT)**.
Kindly ensure you have a working Webcam and Headset with Microphone.

Delegates are required to have MS Excel on their laptops or computers for the purpose of this training.

KEY BENEFITS OF ATTENDING

- **CONSTRUCT** practical financial models to help you make strategic business decisions
- **FORECAST** cash flows in your financial spreadsheet
- **STUDY** the consequences of a badly constructed model
- **TEST** the validity of your financial model by identifying the accuracy, reliability and relevancy of the data in your worksheet
- **VIEW** a large number of permutations and scenarios in your data
- **LEARN** how the Goal Seek and Solver functions can help you achieve a desired level of output in your model
