

Fixed Asset Management Guidance for FM Managers

From Operational Control to Strategic Asset Leadership

13 & 14 April 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

Participants will gain a practical understanding of asset life cycle management, information governance, risk and criticality assessment, and performance measurement within the FM environment. The program integrates the principles of ISO 41001 (Facility Management - Management System) and ISO 55001 (Asset Management), enabling FM professionals to align operational imperatives with corporate strategy, investment planning, and governance expectations.

Participants will, through interactive sessions, structured discussions, review of real-life case studies, and practical exercises, explore maintenance optimisation, financial decision-making, renewal and replacement planning, and the use of digital asset management systems. By the end of the program, FM professionals will be better positioned to provide assurance to senior leadership, justify asset-related investments, and lead their organisations toward a more mature, value-driven approach to the management of the built environment.

Organised by:

WEeventz Pte Ltd (Singapore)
WEeventz Malaysia Sdn Bhd (Malaysia)
