

CARGO & TANK CALCULATION

Knowledge of safe working procedures in handling cargo and tanks

4 - 5 May 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This highly intensive and practical Virtual Instructor-Led Training will help participants to understand how to perform shore-based and ship-based tank level measurement, cargo volume calculation, and mass calculation with step-wise demonstrations including trim and list corrections.

A highly interactive combination of lecture/slide presentations, discussion, and short videos sessions will be managed by a Chemical Engineer with more than 30 years of field process operations experience and training activities in petroleum/petrochemical industries. The training will be more practically oriented with specific examples.
