

# Leadership in Safety & Health Management

*Measure, monitor and evaluate health and safety management systems in your organization*

**20 & 21 July 2026**

9.00am - 5.00pm | GMT +8

**Concorde Hotel, KL**

**Zoom Platform**

## WHY YOU SHOULD ATTEND

This comprehensive workshop is designed to provide participants with a holistic understanding of Safety and Health Management Systems, combining fundamental principles with practical, real-world applications. It begins by establishing the business case for safety, highlighting the true cost of incidents and the value of proactive risk management. Participants will then explore key areas such as hazard identification and control, program design, and regulatory compliance, equipping them with the knowledge needed to build and manage an effective safety framework within their organization.

The workshop also delves into modern safety approaches, including Behavioral-Based Safety (BBS) and Human & Organizational Performance (HOP), to address human factors and organizational influences on safety outcomes. Through interactive discussions, case studies, and practical exercises, participants will develop critical skills in incident investigation, root cause analysis, and safety leadership. By the end of the program, attendees will be empowered to strengthen safety culture, enhance communication, and implement sustainable strategies that drive continuous improvement in workplace safety and health.

Organised by:

WEeventz Pte Ltd (Singapore)

WEeventz Malaysia Sdn Bhd (Malaysia)

## TARGET AUDIENCES

This workshop is ideal for professionals responsible for workplace safety, risk management, and operational efficiency across industries. It is specifically suited for:

- HSE Officers and Safety Managers
- Process Safety Engineers
- Operations and Plant Managers
- Project and Engineering Managers
- Technicians and Supervisors involved in safety-critical operations
- Human Resources and Training Professionals focusing on safety culture
- Any professional seeking to enhance organizational safety performance and implement proactive risk management strategies

It is also highly beneficial for leaders and managers who want to understand safety from both a strategic and practical perspective, regardless of their years of experience in the field.

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
