

Engineering Management Leadership in EPC Projects

Driving Integration, Innovation & Impact in EPC Engineering

8 & 9 June 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This training is designed to equip participants with the leadership skills and practical strategies needed to manage engineering functions with greater confidence and efficiency. Participants will gain a deeper understanding of how to align engineering deliverables with project objectives, ensuring smoother transitions from proposal to detailed design and ultimately to execution.

By attending, participants will learn how to improve design coordination, minimise rework, and proactively manage engineering risks especially in fast-track and high-pressure project environments. The training also provides valuable insights into quality assurance, compliance with international standards, and maintaining audit-ready documentation.

In addition, participants will explore how modern tools such as CAD, BIM, and digital engineering solutions can significantly enhance productivity and collaboration. With a strong focus on leadership, the training will help you build high-performing, multi-disciplinary teams, foster accountability, and drive innovation across engineering functions.

Organised by:

WEeventz Pte Ltd (Singapore)
WEeventz Malaysia Sdn Bhd (Malaysia)

TARGET AUDIENCES

This training will be suitable for:

- Engineering Managers & Discipline Leads
- Project Managers & Project Engineers
- Design Engineers across all disciplines
- EPC Professionals involved in engineering coordination
- Technical Managers & Supervisors
- Anyone responsible for engineering deliverables in EPC projects

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
