

LOTOTO Lock Out, Tag Out & Try Out

From Isolation to Verification: Building a Safer Maintenance Workplace

28 & 29 September 2026

9.00am - 5.00pm | GMT +8

Concorde Hotel, KL

Zoom Platform

WHY YOU SHOULD ATTEND

Effective hazardous energy control is one of the most critical workplace safety measures for preventing serious injuries during maintenance, servicing, troubleshooting, cleaning, inspection, adjustment, installation, and repair activities. Simply turning equipment off is not enough—workers must be able to positively isolate energy sources, control residual energy, verify isolation, and ensure equipment cannot restart unexpectedly.

This training provides participants with a practical understanding of the complete Lock Out, Tag Out and Try Out process, enabling organizations to reduce maintenance-related incidents, strengthen contractor safety management, improve operational discipline, and establish a robust LOTOTO training aligned with workplace safety best practices.

By the end of the training, participants will be able to develop isolation procedures, perform personal and group lockout, manage shift handovers, coordinate contractor activities, verify zero-energy conditions, and implement effective LOTOTO controls across their facilities.

TARGET AUDIENCES

This training is specifically designed for: -

- Maintenance Personnel
- Engineers and Engineering Supervisors
- Electricians and Electrical Technicians
- Mechanical Technicians
- Production Supervisors
- Machine Operators
- EHS / HSE Personnel
- Safety and Health Committee Members
- Contractors and Service Providers
- Authorised Employees
- Affected Employees
- Personnel involved in maintenance, cleaning, inspection, installation, troubleshooting and servicing activities

Organised by:

WEeventz Pte Ltd (Singapore)

WEeventz Malaysia Sdn Bhd (Malaysia)

HRD Corp Claimable Programme

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
