

Storage Tank Design, Construction and Maintenance

Protecting critical assets through effective tank inspection

7 - 9 October 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This training enhances participants' knowledge of storage tank inspection and integrity management, providing a solid understanding of inspection principles, industry standards, and best practices. It improves the ability to identify defects, corrosion, and potential failure mechanisms at an early stage, helping to prevent costly breakdowns and incidents.

The programme also supports compliance with relevant industry standards and regulatory requirements, while reducing safety, environmental, and operational risks associated with storage tank operations. Ultimately, participants will be better equipped to strengthen asset reliability, optimise maintenance planning, and support effective lifecycle management of storage tanks.

TARGET AUDIENCES

This training is specifically designed for: -

- Plant Operator
- Control Room Operators
- Production Supervisor
- Inspection engineers and technicians
- Maintenance and reliability engineers
- Asset integrity and mechanical engineers
- Operations and HSE personnel
- Supervisors involved in tank maintenance and inspection
- Professionals responsible for storage tank management

Organised by:

WEeventz Pte Ltd (Singapore)

WEeventz Malaysia Sdn Bhd (Malaysia) HRD Corp Claimable Programme

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
