

GAS TURBINE TECHNOLOGY

Improve performance, reliability and availability of the machine

2 - 4 December 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This Virtual Instructor-Led Training will provide participants with the knowledge needed to be effective in the inspection, monitoring, and diagnostics of gas turbines, emphasizing the importance of condition monitoring and strip-down inspection approach to maintenance.

Participants will learn the fundamentals of various aspects of the performance of gas turbine engines used in major industries. At the same time, participants will have an excellent background in identifying and overcoming operational problems related to gas turbines.

TARGET AUDIENCES

This event has been specifically designed for: -

- Maintenance Engineers
- Mechanical Engineers
- Control Engineers
- Technical Managers
- Production and Operations Managers
- Plant Operators
- All staff involved in gas turbine technology design, operation, control and troubleshooting

Organised by:

WEventz Pte Ltd (Singapore)
WEventz Malaysia Sdn Bhd (Malaysia)

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.

www.weventz.sg

Strictly limited number of seats to ensure maximum learning and experience for all participants
Thorough and customized program to address current market concerns
Provision of a digital certificate to participants at the end of the training
