

Carbon Capture and Storage in Refinery Industry

*Reduce waste and improve the sustainability of operations
while working towards a clean environment*

29 - 30 October 2026

9.00am - 5.00pm | GMT +8

Concorde Hotel, KL

Zoom Platform

WHY YOU SHOULD ATTEND

This highly intensive and practical training will help participants to understand how to protect the atmosphere with the technology of Carbon Capture and Storage (CCS) from an excess of CO₂. This training will explore the uniqueness of CCS to complement other low-carbon technologies and how CCS can unlock carbon-negative solutions.

Participants will explore the latest examples of projects and strategies from around the world, and evaluate the lessons from them. At the end of this training, participants will be able to understand this technology objectively and why it is so important in our efforts against climate change.

AUDIENCES

This training is specifically designed for: -

- Petroleum Engineers
- Chemical Engineers
- Plant Managers
- Operations Managers/Superintendents
- Process Managers
- Geologist
- Maintenance Supervisors
- Technicians

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
