

SIMOPS & MOPO Analysis

Managing Simultaneous Operations & Matrix of Permitted Operations

4 - 6 November 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

Simultaneous Operations (SIMOPS) present one of the highest risk scenarios in oil & gas facilities, where two or more operations with conflicting hazards occur at the same time and place - e.g., drilling over live production, construction hot-work in a running plant, or lifting over pressurized equipment.

This 3-day intensive course provides a systematic methodology to identify, assess, and control SIMOPS risks and to develop a robust Matrix of Permitted Operations (MOPO). The training moves from theory to practical application, enabling participants to develop and implement a live MOPO for their assets.

Organised by:

WEeventz Pte Ltd (Singapore)
WEeventz Malaysia Sdn Bhd (Malaysia)

TARGET AUDIENCES

This workshop is designed for: -

- Operations Managers
- OIM / Offshore Installation Managers
- HSE Managers & Engineers
- Process Safety Engineers
- Drilling & Completions Engineers
- Maintenance & Construction Managers
- Marine & Logistics Coordinators
- Project Engineers
- PTW Coordinators
- Control of Work Authorities

This is a **Hybrid event** where participants can choose to attend **In Person** at our training venue or join **Virtually** via Zoom Platform.
