

Agentic AI with Claude Designing, Building & Governing AI Agents for the Workplace

From AI Assistance to Intelligent Automation

23 & 24 November 2026

9.00am - 5.00pm | GMT +8

Concorde Hotel, KL

Zoom Platform

WHY YOU SHOULD ATTEND

Participants will gain practical skills in breaking down business processes into manageable, verifiable steps, defining success criteria and establishing appropriate stopping conditions. The training further covers connecting Claude to organisational files, business applications and external systems through tools and connectors as well as designing multi-step and supervisor-subagent workflows to produce complete business deliverables with minimal supervision. In addition, participants will learn to evaluate AI agent performance, test for accuracy and consistency, identify potential failure points, and implement suitable guardrails, approval mechanisms, audit practices and cost controls in line with organisational data governance requirements.

Through hands-on exercises, practical case studies and a final capstone project, participants will gain the knowledge and skills to develop AI agents for workplace use and identify opportunities to improve operational efficiency, consistency and productivity within their organisations.

Organised by:

WEventz Pte Ltd (Singapore)

WEventz Malaysia Sdn Bhd (Malaysia)

HRD Corp Claimable Programme
