AI for Project Management and AI-Driven Workflows using AI Agents

15 - 16 December 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel KL
Zoom Platform

WHY YOU SHOULD ATTEND

As project environments become more complex and fast-paced, traditional project management approaches are no longer sufficient on their own. This training shows how Artificial Intelligence and AI agents can be practically applied to improve project efficiency, visibility, and outcomes. Participants will learn how to use AI to automate routine project tasks, generate real-time insights, and support better planning, tracking, and decision-making.

This training equips professionals with the knowledge to identify where AI adds real value across the project lifecycle, while maintaining governance, accountability, and control. By building AI-driven workflows, participants can reduce administrative burden, enhance collaboration, and enable project teams to focus on higher-value work. This training is ideal for organisations seeking to modernise project delivery, increase productivity, and remain competitive in an AI-enabled business environment.

TARGET AUDIENCES

This training is suitable for:

- Project managers and programme managers
- PMO professionals and project coordinators
- Business analysts and operations managers
- IT and digital transformation teams
- Team leaders involved in project delivery
