Big Data Analytics for Finance Professionals

From Audit Findings to Effective Management Reports

21 & 22 December 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This training is designed to help finance professionals make better use of data in their day-to-day responsibilities. Participants will learn how Big Data Analytics can be applied to budgeting and forecasting, cash flow management, profitability analysis, fraud detection and financial risk assessment. The training also introduces practical applications of data visualization, dashboards, artificial intelligence and machine learning in financial analysis and reporting.

Through relevant case studies, practical exercises and demonstrations, participants will gain a better understanding of how to turn financial data into useful insights for management decision-making. The training also addresses data quality, governance, security and the responsible use of AI, enabling participants to appreciate the considerations involved in applying analytics within their organizations.
