Digital Dominance in Supply Chain

Driving Supply Chain Excellence Through Smart Technologies and Data-Driven Decisions

21 - 23 December 2026
9.00am - 5.00pm | GMT +8

Concorde Hotel, KL
Zoom Platform

WHY YOU SHOULD ATTEND

This training combines trainer-led explanations, practical manufacturing and logistics examples, guided discussions, classroom activities, two case studies, three quizzes and a final examination. Technology concepts will be explained in accessible business language, with emphasis on their application, benefits, limitations and implementation requirements.

Participants will leave with a clearer understanding of digital supply chain technologies, the confidence to identify relevant business applications and a practical framework for initiating digital improvement projects within their organizations. Each participant will develop an initial digital supply chain improvement roadmap identifying a priority business problem, the proposed digital solution, expected benefits, key implementation considerations and suggested performance indicators.
